## The human body: Our 5 senses

### Parts of the human body

### Key Vocabulary

Brain	Inside the skull. It is how we think and the central control point for the nervous system.
Calf	The area of the back of your leg between your ankle and knee.
Chest	The front part of the body protected by the ribs and breastbone.
Senses	Allow us to observe and understand the world around us.
Sight	The process and ability to see.
Smell	To notice something because of its odour.
Sound	The noises heard by the ear.
Taste	The process by which flavours are detected by the tongue.
Touch	The act you do when you hold or feel something with your hand.
Wrist	A body part between the hand and arm.

### The 5 senses

Hearing	Sight	Touch	Smell	Taste
				
Ears	Eyes	Fingers, hands, feet	Nose	Tongue
